

Another Battle

Naomi Peña

Just when you thought it was over
Another battle begins
Just when you've conquered Jericho
You discover Achan in sin
Just when you've fought off your enemy
You're pulled down by your own men
You cry out to God, "I'll keep fighting, Lord,
"But I don't believe I can win."

*And I am so glad that God fights the battle
And I am so glad the victory is His
'Cause whether I die when I'm still fighting,
Or whether I finally win
Every affliction will just make me stronger
Every affliction will help me to see
That I can do nothing here without my Saviour
And He uses sinners like me*

Joshua was scared to take over
And lead Israel into the land
David was running away from the king
And hid in the woods with his men
Still God would give them an answer,
Each time that they knelt down to pray
"God, would you give us this battle?
Or should we just walk away?"

*And I am so glad that God fights the battle
And I am so glad the victory is His
'Cause whether I die when I'm still fighting,
Or whether I finally win
Every affliction will just make me stronger
Every affliction will help me to see
That I can do nothing here without my Saviour
And He uses cowards like me*

Now fighting is not always easy
And sometimes you feel all alone
But if you are doing your duty
And serving the way you are shown
With no guarantee of an answer
Yet fully surrendered in all
You'll find peace beyond understanding
And courage and strength not to fall

*And I am so glad that God fights the battle
And I am so glad the victory is His
'Cause whether I die when I'm still fighting,
Or whether I finally win
Every affliction will just make me stronger
Every affliction will help me to see
That I can do nothing here without my Saviour
And He uses nothings like me*
